

# ***ENERGY RESEARCH AND DEVELOPMENT AUTHORITY***

## ***MISSION***

The New York State Energy Research and Development Authority (NYSERDA) was established in 1975 to develop and implement new energy technologies, focusing on renewable energy sources and energy conservation.

As part of its central mission, the Authority manages energy research, development and demonstration programs, which are funded by assessments on gas and electric utilities. The Authority's programs strengthen New York's economic base by nurturing the growth of new products and industries and helping businesses reduce their costs. Projects are selected on a competitive basis to promote applied research on State energy problems. The Authority administers Federal grant programs which help businesses, schools and hospitals implement energy efficiency measures. It also issues tax-exempt bonds on behalf of investor-owned utilities for capital improvements. The Authority also administers the System Benefits Charge, which supports energy programs for low-income consumers, energy efficiency, energy research and development, and environmental protection.

The Authority also manages the former nuclear fuel reprocessing plant at West Valley in Cattaraugus County and the Saratoga Technology + Energy Park (STEP) in Saratoga County. Currently, NYSERDA has several clean-energy technology companies located at STEP, and is continuing to work toward bringing in other clean-energy technology companies.

## ***ORGANIZATION AND STAFFING***

The Energy Research and Development Authority is headed by a 13-member board, consisting of 9 members nominated by the Governor with the consent of the Senate and 4 ex-officio members, which include the commissioners of the departments of Transportation and Environmental Conservation, and the chairs of the Public Service Commission and the Power Authority of the State of New York. All board members serve without compensation.

## ***FISCAL BACKGROUND AND BUDGET HIGHLIGHTS***

The Energy Research and Development Authority is partially funded by assessments on State public utility gross intrastate operating receipts. The 2005-06 Budget recommends approximately \$14.7 million in appropriations for the Authority's energy, research and development programs and \$11.35 million for ongoing work at West Valley.
